

W-Beam Racking Protector Kits

W-Beam heavy duty racking end protectors minimise damage to racking from forklifts and low speed manoeuvring vehicles. They can also be used for other asset protection applications where a strong, visible barrier is required. The modular design is available in kit form in three standard lengths, all 400mm high.

Kits include high visibility post caps and rail end boots

PART No.	DESCRIPTION
WRP1320	W-Beam racking protector 1320mm long (27.5kgs) – Galvanised
WRP1820	W-Beam racking protector 1820mm long (32.7kgs) – Galvanised
WRP2320	W-Beam racking protector 2320mm long (37.9kgs) – Galvanised

Menni Racking Protector Kits

Menni racking end guards are used to minimise damage to racking and product as a result of impact by forklifts, vehicles and trolleys. Moulded interlocking modules made from LLDPE are highly visible and virtually indestructible. Available in two standard lengths to suit single or double width racking.

Blanking plugs prevent debris build-up in mounting holes and ensure solid module connection

PART No.	DESCRIPTION
MRP1100	Menni single racking end guard 1100mm long (3.6kgs) – Yellow
MRP2200	Menni double racking end guard 2200mm long (6.4kgs) – Yellow
