

Dugite Concrete Wheel Stop

DESCRIPTION

Dugite concrete wheel stops are a simple solution to protect vehicles and property from damage whilst vehicles are being parked, in any type of parking situation. If you do not like the look of plain concrete, they can be painted to fit any colour scheme or for high visibility. The concrete wheel stops weigh 65 KGS and are superior to the rubber wheel stops as they are very robust and all Wheel Stops with comply with AS2890.1.2004. We can provide quality installation services which is the most convenient option when it comes to your business, given they are heavy and difficult to maneuver.
